姓名	学号
崔璨明	20337025

向 STUDENTS表插入编号是"800022222"且姓名是" WangLan"的元组。

2.

向 TEACHERS表插入元组("200001000","LXL","s4zrck@pew,net","3024")。

```
insert into TEACHERS
values('200001000','LXL','s4zrck@pew,net','3024')
```

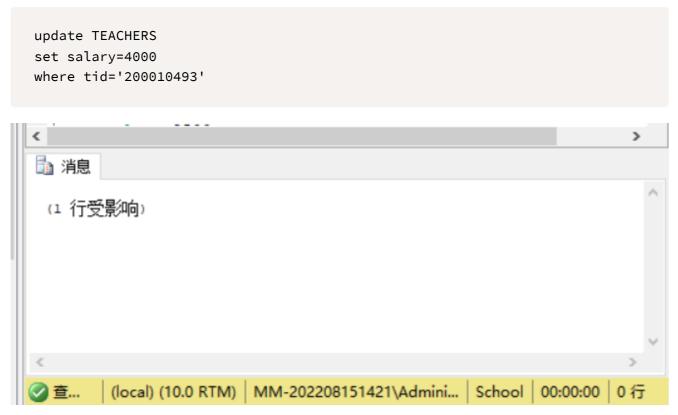

同样可以查询到插入的信息:

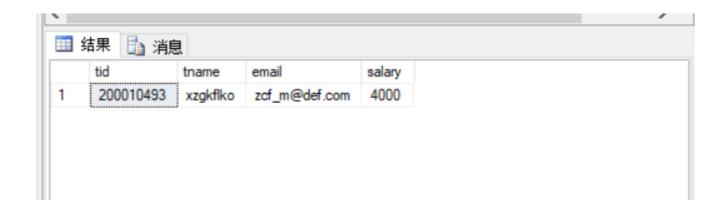

3.

将 TEACHERS表中编号为"200010493"的老师工资改为4000。

可以看到该老师的工资已经被修改:

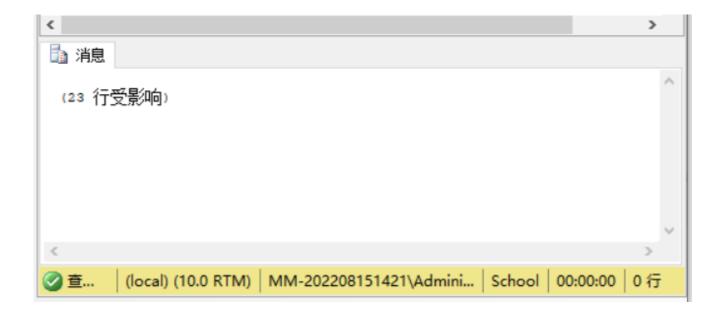

将 TEACHERS表中所有工资小于2500的老师工资改为2500。

5.

将编号为"200016731"的老师讲授的课程全部改成由姓名为"rnupx"的老师讲授。

```
update CHOICES
set tid=(select tid from TEACHERS where tname='rnupx')
where tid='200016731'
```

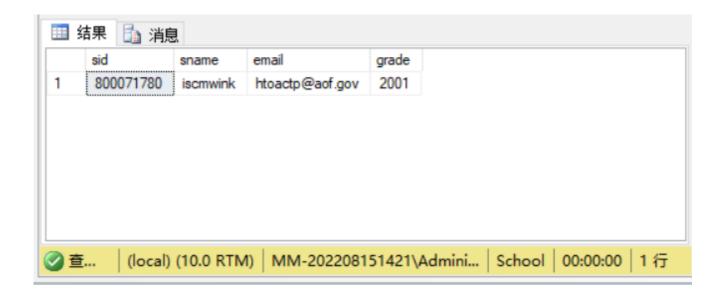

更新编号"800071780"的学生年级为"2001"。

```
update STUDENTS
set grade='2001'
where sid='800071780'

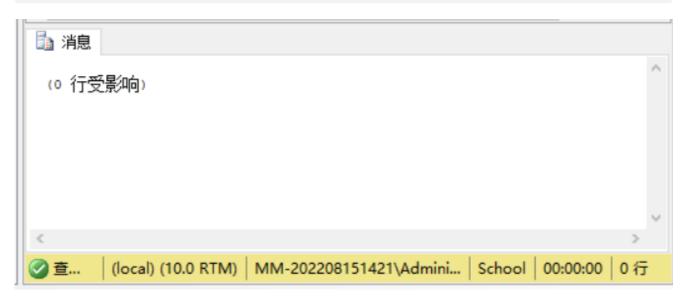

(1 行受影响)
```

查看修改的结果:

删除没有学生选修的课程。

delete COURSES
where cid not in (select distinct cid from CHOICES)

可见没有课程是没有学生选修的。

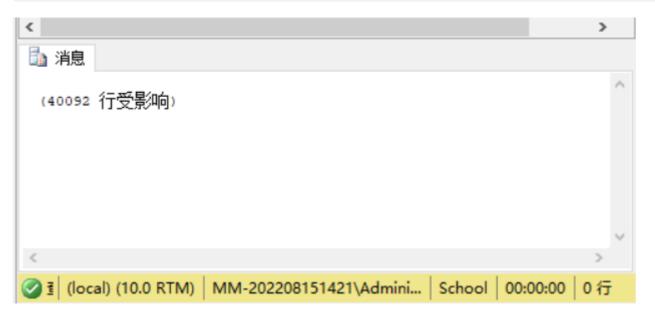

8.

删除年级高于1998的学生信息。

```
-- 首先取消choices表中的外键约束:
USE school
GO
```

ALTER TABLE CHOICES
DROP CONSTRAINT FK_CHOICES_STUDENTS

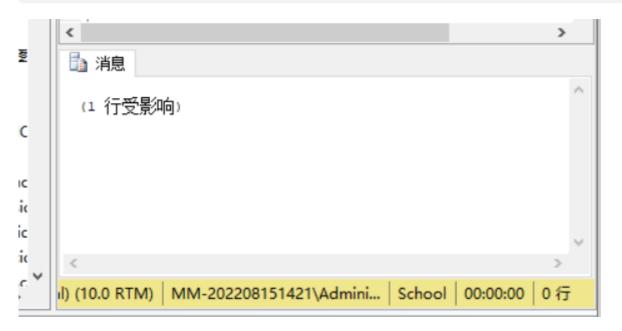

-- 然后再删除:
delete STUDENTS
where grade>1998

9.

删除没有选修课程的学生信息。

```
delete STUDENTS where sid not in (select distinct sid from CHOICES)
```

删除成绩不及格的选课记录。

delete CHOICES
where score<60
